- Developed a service for issuing and tracking medical documents for patients by nurse practitioners in NodeJS
- Integrated multiple internal microservices via asynchronous flow using Kafka as messaging queue

Telemedicine Consultations Web App

- Worked on a web app for Nurse Practitioners to perform online video consultations, record notes and issue medical documents
- Optimized image upload flow

Software Engineer

Run4U, Lviv, Ukraine

July 2020 - December 2020

Running club training management platform

- Developed training management dashboard React app
- Developed GraphQL serverless api for training management and tracking
- Implemented authentication, authorization, emails and push notifications

Software Developer

AVR Spot Creative, New York, NY

Nov 2018 - April 2019

Employee Awareness and Cultural Engagement Platform

- Developed iOS and Android app based on Cordova and React
- Implemented Web Dashboard with administrative and reporting capabilities
- Implemented PGP-based user data encryption flow
- Created Web Portal with support of data driven surveys, authentication and encryption

Software Developer

360insights.com, Whitby, ON

Apr 2017 - Nov 2018

Generic Volume Incentives Platform

- Set up Web and API services from ground up
- Configured module bundlers and implemented custom Webpack/Rollup loaders/plugins
- Developed and maintained Reusable UI Components Library
- Designed and implemented gRPC services
- Wrote epics and user stories

Business Intelligence Enhancements

- Developed UI dashboard features
- Developed TSQL queries and stored procedures
- Refactored existing codebase

Async Reports Workflow

- Developed back end services with REST API and async messaging
- Implemented files and metadata storage with AWS S3 and DynamoDB

- Implemented asynchronous web notifications with Server Sent Events and RabbitMQ
- Responsive front end development with React and Sass

Volume Incentives Platform

- Built REST APIs with Express and Restify
- Created TSQL queries and stored procedures
- Responsive front end development with React and Sass

Co-Operative Advertising Incentives Portal

- Front end development with React and Sass

Technical Business Analyst

360insights.com, Whitby, ON

Oct 2014 - Mar 2017

- Elicited, analyzed and documented business requirements.
- Documented system requirements in forms of user stories, wireframes and system process models.
- Prioritized and managed requirements through SDLC.

Education

2018 Course: Algorithms: Design and Analysis, Stanford University

2014 Postgraduate: Information Systems Business Analyst, George Brown College

2010 M.Sc. in Computer Science in Economics, Tyumen State University

Technical Skills

NodeJS, React, Redux, React-Query, GatsbyJS, NextJS, StyledJSX, Sass, Webpack, Rollup, Babel, NestJS, Express, Restify, Storybook, RabbitMQ, Kafka, Server Sent Events, AWS S3, AWS DynamoDB, TSQL, PostgreSQL, MongoDB, gRPC, GraphQL, JasperSoft, Jest, Mocha, Chai, Git, Terraform, Serverless
